DETAILED ACTION

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors, e.g., typographical, grammar, idiomatic, syntax and etc. Applicants' cooperations are requested in correcting any errors of which applicants may become aware in the specification.

The abstract of the disclosure is objected to because of the inclusion of legal phraseology often used in patent claims such as : "comprises" in line 5 and "comprising" in lines 8-9. Correction is required. See MPEP § 608.01(b).

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a). The preamble of claim 1 recites ".. process for obtaining oligomers of polytetrahydrofuran or of tetrahydrofuran copolymers from a methanolic crude product which contains polytetrahydrofuran or tetrahydrofuran copolymers and is obtained in the transesterification of the mono- and/or diesters of polytetrahydrofuran or tetrahydrofuran copolymers with methanol", however, the body of the claim is more directed to purification or distillation process rather than to a process of obtaining, producing or manufacturing as recited above.

b). Reciting a "first distillation" in claim 1, step a) without reciting a second distillation step and etc., provides for ambiguity in the claims.

c). The claims or at least part of the claims are recited in passive rather than active steps, e.g., "by distillation into a top fraction" in claim 1, line b).

d). Claims 6 and 13-16 recite the limitation "the transesterification catalyst" in lines 2. There is insufficient antecedent basis for this limitation in the claim.

e). The inconsistent use of terminology in the claims such as "condensing" in claim 1, c), as opposed to "condensation" in claims 5, 10-12 is improper.

Claims 1-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a). Bohner et al discloses a process for the single-stage preparation of polytetrahydrofuran and/or tetrahydrofuran copolymers including fractionating in at least one distillation step to give a distillation residue comprising THF.
